

Basic Troubleshooting Techniques

The Flightline Training Services troubleshooting program is an instructor lead interactive training program that is an excellent tool for learning a proven troubleshooting method and also applying troubleshooting techniques in a very realistic simulated environment. The circuit used in this program was designed to reinforce a very logical approach to solving problems.

This three day training program teaches a proven systematic troubleshooting approach. The process is explained using animated graphics and text. The simulation behaves as the real circuit would. You can remove wires, operate controls and perform various checks.

Learn to troubleshoot in a safe environment using electrical circuit, taking voltage and resistance readings, and test the circuit after repairs are completed.
